

ACTIVE VENTILATOR POWERED BY AIR+ SMART MASK NO MORE WET MASKS OR FOGGED UP GLASSES

STLFLX AIRGUARDZ

Conventional protective masks in the market today are simply not designed for comfortable use at work. With prolonged use, often users will endure stuffiness and discomfort due to the accumulated heat, humidity and CO₂ within the mask. As users re-breathe accumulated CO₂ trapped within the mask, they may experience symptoms of dizziness, reduced alertness and headaches.

Introducing STLFLX™ AirGUARDZ™ powered by AIR+ Smart Mask – a revolutionary innovation in protective mask technology. With an ergonomically-engineered mask and the world's first attachable smart fan for active cooling, the AIR+ Smart Mask is designed to help users breathe better as they work. The revolutionary Active Ventilator rapidly extracts trapped heat, moisture and CO₂ within the mask for cool breathable comfort with every breath.

CERTIFIED PROTECTION

The AIR+ Smart Mask is available in NIOSH-Approved (N95/99) models to suit your workplace needs and requirements.

RAPID VENTILATION

Powerful airflow rate enables rapid extraction of heat, humidity and CO₂ for active air circulation

- Reduces temperature by up to 4°C (7.2°F)
- Reduces relative humidity by up to 40%
- Eliminates CO₂ build-up

SECURE GRIP

Ergonomic and rugged design ensures a secure grip and durability during use

RECHARGE AND REUSE

Fast and convenient charging via micro-USB

4 HOURS
run time

1.5 HOURS
full charge

IP53-RATED
dust and splash
resistant

COMPACT AND
LIGHTWEIGHT
24g (0.85 oz)

DROP
PROTECTION
durable and
impact-resistant

"It is the closest you will get to breathing naturally."

N95 & N99 MASKS POWERED BY AIR+ SMART MASK

STLFLX AIRGUARDZ

There is a wide range of masks available in the market today. However, they do not address the discomfort and dangers of extended mask use, including:

ACCUMULATED HEAT & HUMIDITY

Mask wearers have to endure the heat and moisture that tends to get trapped inside these masks.

CARBON DIOXIDE BUILD-UP

Exhaled carbon dioxide builds up inside these conventional masks with each breath. Inhaling this trapped carbon dioxide can lead to physiological symptoms such as dizziness, headaches and nausea.

EXTRA COMFORTABLE FIT

The fit of the mask is designed in such a way that the AIR+ disposable mask fits tightly and securely on all facial shapes, ensuring that you avoid steamed up safety goggles. The mask is comfortable to use due to the soft materials and the padded alu-nose clip.

EASY TO ADJUST

The elastic strap runs all the way through the mask, so you simply and easily can adjust the entire mask with a single pull.

EXTRA SAFETY

Newly developed and patented exhalation valve, giving you increased safety; the valve closes at every inhalation – no matter your working position.

COMPATIBLE WITH ACTIVE VENTILATOR

Smart Mask fits perfectly with the Active Ventilator, transforming into an advanced mask that delivers active air circulation while you work.

NIOSH

CERTIFIED PROTECTION

The AIR+ Smart Mask is available in NIOSH-Approved (N95/99) models to suit your workplace needs and requirements.
